

## **R. Kelly Lion - 36"x60" Latex On Canvas 2009**

Amy doesn't like this painting of a pink lion, she thinks it needs something else. I was going to paint a giant can of "New" Coca-Cola on it, but then decided on a Food Lion sign. After realizing how much time that would take, I simply added R. Kelly's name to the title. CASE CLOSED. Like videotaping yourself peeing on a 14 year old girl and then going to court over it and winning the case. CASE CLOSED.

## **Rad Blagojevich - 20"x20" Latex On Wood 2009**

Man, people in Chicago are so mad at this guy! He said he was going to clean up the corrupt windy city Government but then did the exact opposite. I thought I would make a quick buck by selling paintings of him, but nobody bought it. I changed the "o" in his first name to an "a", now this painting is 5 times better.

## **RIBS ARE READY - 24"x14" Latex On Wood 2009**

When I first started making paintings for this show I searched the Internet for things related to Norman. I eventually came across a BBQ restaurant that has a sign that says "RIBS ARE READY". Man, that's a real gas! When I showed Amy she said that though the ribs may be ready, they aren't tasty. If you own or work at that place, she said that the ribs there were REALLY GOOD.

## **Rollie Fingers - 18"x18" Latex On Wood 2009**

Rollie Fingers never paid taxes in Milwaukee when he was the pitcher there from 1972-1988. He claims that he has straightened everything out with the city, but reports keep surfacing about the vast amount that he still owes. I bet it was difficult to grow up having the last name of plural body parts. If my name were Derek Feet, I'd be pretty bummed out.

## **She Made Them Realize - 32"x24" Latex On Wood 2009**

In this picture, a Congresswoman is explaining to a Flaming Lips cover band called INSERT COYNE exactly what is wrong with their approach.

## **Sign For Guidebooks - 12"x12" Toner Transfer & Latex On Wood 2009**

This is a sign advertising the book that you are reading. I made it for sale. I have a lot of nerve!
